About me

Full Stack Development ,Out-of-the-box thinking ,UX/UI
Problem Solving ,Excellent Presentation, Interpersonal ,Creativity

TECHNICAL SKILLS

C / C++ ,Java ,JavaScript (es6) ,X86 ,Bash ,Python ,TypeScript,
HTML \ Canvas, Node js ,React ,Express ,Multer ,Tailwind, MongoDB
AWS, IDA, putty, VM ware

WORK EXPERIENCE

2016 – Present   CYBER EDUCATION CENTER

2019 - 22   : Infrastructure / DevOps Engineer

- Significantly improved website performance and reliability by maintaining pre-written server codes and accessed source code.
- Responded promptly and effectively to field-related problems, demonstrating strong knowledge of different processes and servers.
- Initiated the process of updating outdated systems to new models and technologies.

2019 - Present : Software Architecture Domain Expert

- Design the content of the Architecture Course by presenting clear goals to coordinators and instructors nationwide.
- Design and adaptation study materials, allowing for the creation of exercises and topics that were engaging and challenging for students.
- Create challenging exercises and guided solutions in the field of low-level languages, including assembly (x86) and operating systems, which were used in the twelfth year (project year).

2018 - Present : Software Architecture Course Lead

- Serve as an acting director of training, performing administrative and management functions, participating in management meetings, and executing managerial decisions independently.
- Successfully manage site days in the field of reverse engineering, including training and directing 4 subject coordinators, 40 instructors, and 150 trainees.

2016 - 18   : Team Leader

- Headed small teams of 12 students, improving task efficiency by dividing and prioritizing tasks and implementing sprints in the Agile model.
